

# REYDARFJORDUR ACID VOLCANIC CENTRE sheet 2

## REYDARFJORDUR ACID VOLCANIC CENTRE

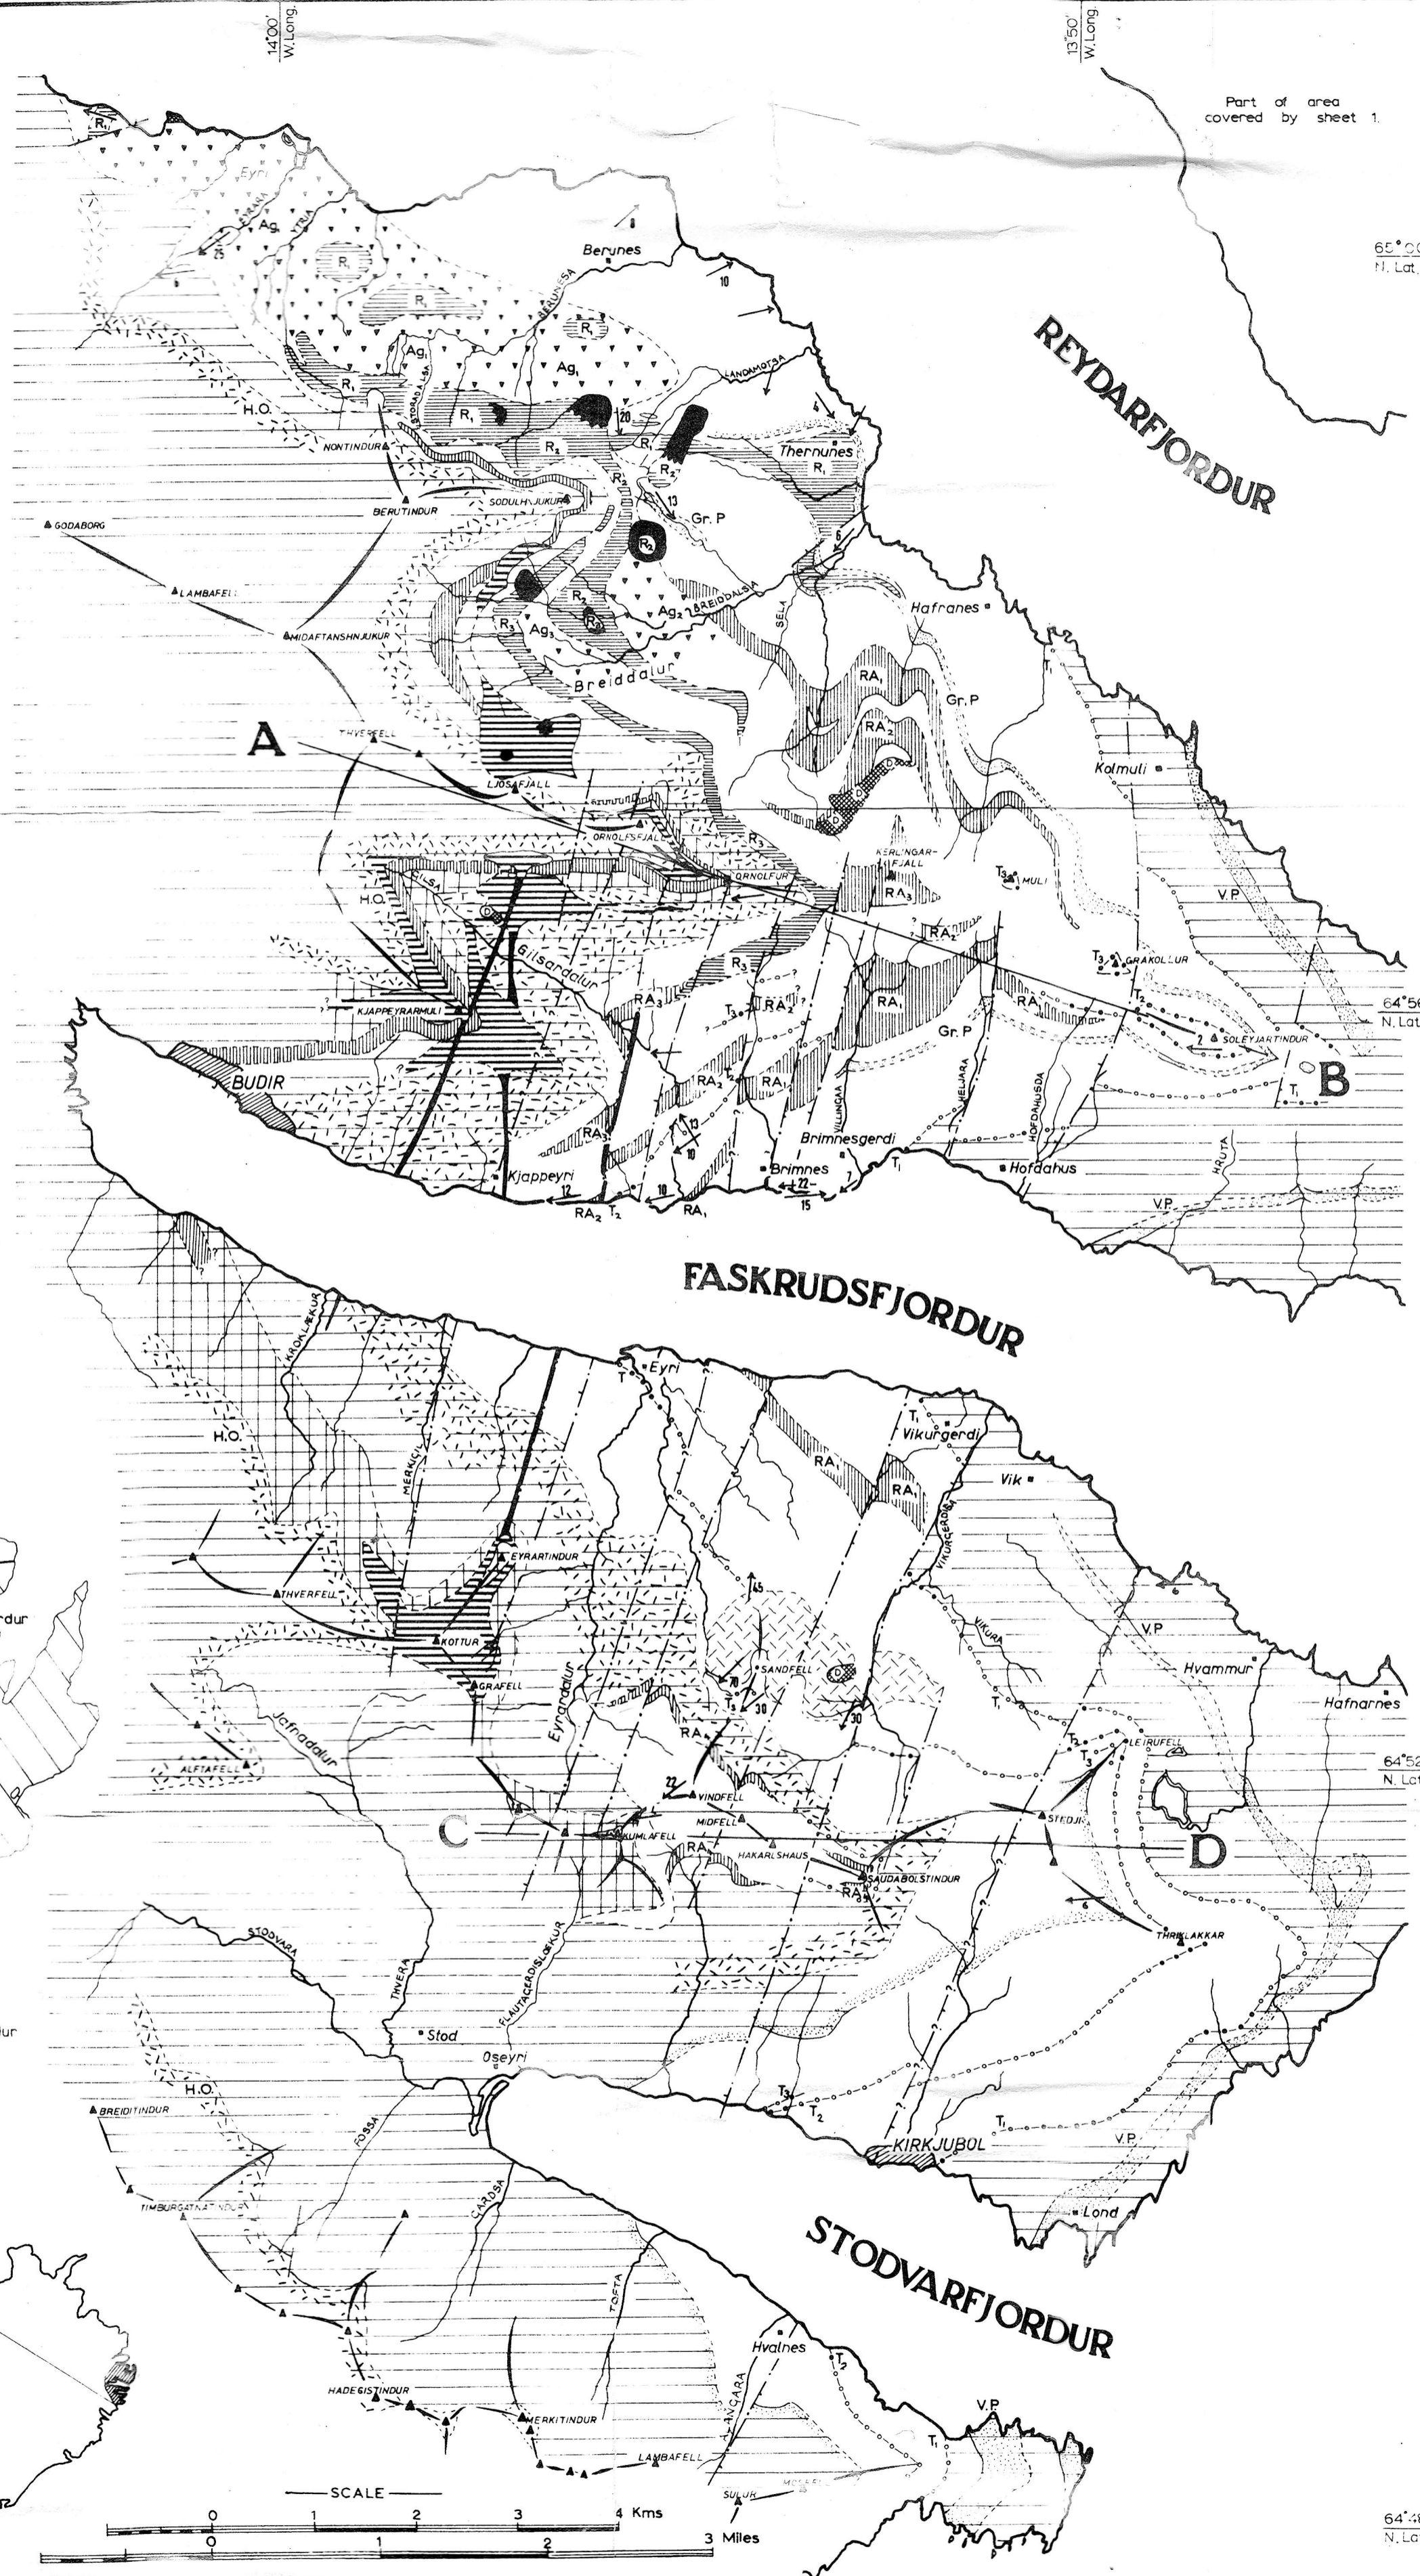

- Undifferentiated Tholeiite and Basaltic Andesite lavas
- Rhyolite Lavas (R)
- Rhyolitic Andesite Lavas (RA)
- Composite Lavas
- Rhyolite Vent - intrusions
- Agglomerate (Ag)
- Sandfelli laccolith and associated sill
- Dolerite intrusions (D)
- Composite Dykes (Composite Lava feeders)
- Bedded Acid Tuff (T) (exposed, inferred)

## LAVAS OF FLOOD BASALT TYPE

- Tholeiite
- Olivine - Basalt
- Porphyritic Basalt
- Undifferentiated
- Farmhouse
- Summit
- Dip in degrees

Data for the Vindhals Porphyritic Group (V.P.) from GPL Walker & DJJ Kinsman

Topography based on 1:100,000 map of Iceland, sheets 114 and 115, modified from aerial photographs. Geological mapping by I.L. Gibson 1960 - 1962

Part of area covered by sheet 1.
